

Technology Transition Initiative

Accelerating delivery of mature technology to the Warfighter

Affordable Insensitive Munitions (IM) Compliant Training Projectiles (M107E1)

Summary: Give the soldier a safer, combat-representative, less expensive training round in de-militarized (DEMILed) M483 Cluster Munition projectile bodies that would be IM compliant. TTI funding will accelerate fielding of this new, cost-effective, combat representative, 155mm training projectile by approximately one year.

Current status: project in work
